SUMMARY

Third-year Software Engineering undergraduate at the University of Kelaniya with a strong focus on full-stack development. Proficient in the MERN stack and Java Spring Boot, with hands-on experience building scalable e-commerce platforms, secure reservation systems, and microservices architectures. Eager to leverage strong backend design and modern frontend skills to deliver robust, scalable, and user-centric software solutions.

EDUCATION

B.Sc.(Hons.) Software Engineering

University of Kelaniya

- CGPA: 3.61
- Specializing in Net-Centric Applications, Data Science and Engineering Applications, Health Informatic Applications domains.

G.C.E. Advanced Level

Telijjawila Central College

- Physical Science Stream
z - score : 1.5045

SKILLS

Languages : Java, JavaScript, TypeScript, C, HTML, CSS, SQL
Frontend : React.js, Next.js, Redux Toolkit, Tailwind CSS
Backend : Node.js, Express.js, Spring Boot, REST APIs
Databases : PostgreSQL, MongoDB, MySQL
AI & Data : Generative AI, Gemini API, Prompt Engineering
Tools & Platforms : Git, Docker, Postman, Vercel

PROJECTS

ELIX-Clothing-Store

Individual

[LIVE SITE](#)

[GITHUB REPO](#)

- Developed a full-stack e-commerce platform utilizing the **MERN stack (MongoDB, Express.js, React, Node.js)** to handle dynamic product catalogs and seamless order processing.
- Implemented secure user authentication and authorization workflows utilizing **JWT (JSON Web Tokens)** to protect backend API endpoints and ensure safe session management.
- Integrated **Cloudinary API** for efficient media management and optimized product image delivery.
- Implemented global state management using **Redux Toolkit** to maintain synchronized cart data and user authentication states, resulting in a highly responsive shopping experience.

Book Fair Reservation System

Academic – Group

[GITHUB REPO](#)

- Engineered a full-stack stall reservation system for the Colombo International Book Fair using **Spring Boot** and **React (TypeScript)** to automate and streamline vendor bookings.
- Implemented secure **JWT-based authentication** to manage user sessions and protect against vulnerabilities.
- Developed an automated EmailService workflow that dispatches real-time booking confirmations and dynamically generated QR code tickets to vendors.
- Collaborated within a team environment to build an intuitive frontend vendor interface, optimizing state management and API integration for a seamless booking workflow.

PlayNex-Microservices

Individual

[GITHUB REPO](#)

- Architected a scalable gaming platform backend utilizing a **microservices pattern** with **Node.js** and **Express.js** to isolate user management and authentication services.
- Integrated backend RESTful APIs with a responsive, dynamic **React.js** frontend to ensure an interactive user experience.
- Designed robust data handling workflows using **MongoDB** to support high availability and secure user data management.
- Configured efficient inter-service communication and centralized error handling to ensure fault tolerance and consistent performance across the distributed backend architecture.

CERTIFICATES

- [Introduction to Cloud 101 – AWS Educate](#)
- [Getting Started to Storage – AWS Educate](#)

ACHIEVEMENTS

- Participated, Junior Hack hackathon (Software Engineering Students' Association UOK)

VOLUNTEERING

- Software Engineering Students' Association – Head Of Media Management 📅 **May 2026–Present**
- Software Engineering Students' Association – Committee member 📅 **April 2025 – May 2026**
- IEEE Xtreme 19.0 – Organizing committee Member 📅 **Sep 2025 – Oct 2025**

PROFESSIONAL SKILLS

- Quick Learner, Cross-Functional Collaboration, Verbal and Written Communication, Time Management, Agile Project Management, Analytical Thinking and Problem Solving

LANGUAGES

- English (Professional Proficiency)
- Sinhala (Native)

REFERENCE
