SUMMARY

Third-year B.Sc. Software Engineering undergraduate at the University of Kelaniya with a strong focus on full-stack development. Proficient in the MERN stack and Java Spring Boot, with hands-on experience building scalable e-commerce platforms, secure reservation systems, and microservices architectures. Eager to leverage strong backend design and modern frontend skills to deliver robust, scalable, and user-centric software solutions.

EDUCATION

B.Sc.(Hons.) Software Engineering

University of Kelaniya

- CGPA: 3.61
- Specializing in Net-Centric Applications, Data Science and Engineering Applications, Health Informatic Applications domains.

G.C.E. Advanced Level

Telijjawila Central College

- Physical Science Stream
- z - score : 1.5045

SKILLS

Frontend : React, Next.js (Routing, SSR), JavaScript, TypeScript, HTML5, CSS, Tailwind CSS (Config customization, component utilities, responsive design)

Backend : Springboot, Express.js, Node.js, Java, PHP

Database(SQL & NoSQL) : PostgreSQL (Relational design, indexing), MongoDB, MySQL.

Cloud : AWS, Docker (Containerization).

Tools : OOP, RESTful APIs, JWT Authentication, Git, Software Maintenance & Debugging

PROJECTS

ELIX-Clothing-Store

Individual

[LIVE SITE](#)

[GITHUB REPO](#)

Developing a full-stack apparel e-commerce platform using the MERN stack. Implemented core features including dynamic product catalogs, cart management, and seamless order processing using MongoDB for scalable data storage. Used Docker for containerization to ensure consistent development and deployment environments.

- Keywords : eCommerce, Full-Stack, Product Management, RESTful APIs, Containerization
- Technologies : MongoDB, Express.js, React, Node.js, Docker, Cloudinary API, JWT

Book Fair Reservation System

Academic – Group

[GITHUB REPO](#)

Engineered a full-stack stall reservation system for the Colombo International Book Fair using Spring Boot and React (TypeScript) to automate vendor bookings. The system features secure JWT-based authentication and an automated ticketing workflow with QR code generation and real-time email alerts.

- Keywords : Backend, Reservation Management, API Development, QR Generation
- Technologies : React, Java, Spring Boot, TypeScript, REST APIs

PlayNex-Microservices

Individual

[GITHUB REPO](#)

Developed a comprehensive full-stack gaming platform utilizing a microservices architecture. Built scalable backend services for user management and integrated a dynamic, responsive frontend interface. Focused on robust system design, secure data handling, and creating an interactive user experience using modern web technologies.

- Keywords : Gaming Platform, Microservices Architecture, User Management
- Technologies : MongoDB, Express.js, React.js, Node.js (MERN)

CERTIFICATES

- [Introduction to Cloud 101 – AWS Educate](#)
- [Getting Started to Storage – AWS Educate](#)

ACHIEVEMENTS

- Participated, Junior Hack hackathon (Software Engineering Students' Association UOK)

VOLUNTEERING

- Software Engineering Students' Association – Head Of Media Management 📅 May 2026–Present
- Software Engineering Students' Association – Committee member 📅 April 2025 – May 2026
- IEEE Xtreme 19.0 – Organizing committee Member 📅 Sep 2025 – Oct 2025

LANGUAGES

- English (Professional Proficiency)
- Sinhala (Native)
